Te Mauri o Rongo – The New Zealand Health Charter

The foundation for how we ensure our people are empowered, safe and supported while working to deliver a successful healthcare system, is Te Mauri o Rongo – the New Zealand Health Charter. It guides all of us as we work towards a healthcare system that is more responsive to the needs of, and accessible to all people in Aotearoa New Zealand.

It applies to everyone in our organisation and sits alongside our code of conduct as our guiding document.

Te Mauri o Rongo consists of four pou (pillars) within it, including:

Wairuatanga – working with heart, the strong sense of purpose and commitment to service that health workers bring to their mahi.

Rangatiratanga – as organisations we support our people to lead. We will know our people; we will grow those around us and be accountable with them in contributing to Pae Ora for all.

Whanaungatanga – we are a team, and together a team of teams. Regardless of our role, we work together for a common purpose. We look out for each other and keep each other safe.

Te Korowai Āhuru – a cloak which seeks to provide safety and comfort to the workforce.

These values underpin how we relate to each other as we serve our whānau and communities.

Together we will do this by:

- caring for the people
- recognising, supporting and valuing our people and the work we all do

- working together to design and deliver services, and
- defining the competencies and behaviours we expect from everyone.

About the role

The Clinical Nurse Specialist (CNS) provides leadership of nursing*, consistent with the wider inter-disciplinary team approach, that ensures best outcomes for tāngata whaiora and whanau. This is achieved through the fostering of a practice culture that is founded upon clinical excellence, teaching and research, equity and tikanga-informed nursing practice.

* nursing in this document refers to registered and enrolled nurses, along with mental health assistants

Role Responsibilities	Expected Outcomes / Performance Indicators
Providing a nursing leadership voice	• Provides a nursing perspective in the area's model of practice delivery • Provides nursing advice to the multi-disciplinary team • Contributes to service and policy development • Contributes to projects, steering groups and consultation mahi • Contributes to investigations and processes as requested by the Nursing Director Lead of Service.
Leading the implementation of evidenced-based nursing practice within clinical decision-making	• Provides the nursing team with contemporary best-evidence for nursing practice with tāngata whaiora • Coaches nursing teams to integrate best-practice approaches into nursing care processes • In consultation with the Nursing Director and Service Leads, identifies and engages in local, regional and national health initiatives that aim to improve clinical practice • Carries out quality improvement processes (such as clinical audits) to improve clinical practice
Providing nursing leadership to nurses working with tāngata whaiora with complex needs	• Undertakes comprehensive clinical assessments of tāngata whaiora who have complex nursing care needs • Provides specialised clinical advice and guidance on the care of tāngata whaiora who present with complex nursing needs with anti-coagulation and bleeding disorders • Contributes a nursing perspective to the multi-disciplinary team to ensure best outcomes for tāngata whaiora with complex needs
Leading tikanga-informed nursing practice within teams	• Provides support and guidance to the nursing team to ensure that all practice is tikanga-informed • Role-models tikanga-informed practice within their own mahi • Leads activities to improve the recruitment, retention, development, and leadership opportunities of Māori kaimahi
Leading a values-based nursing team culture based on equity, inclusion	• Leads initiatives to ensure that the tāngata whaiora voice is represented in all decision-making • Role-models practice that is professional, equitable and inclusive

and professionalism	- Leads practice initiatives to ensure a practice culture that lessens health inequities for tāngata whaiora - Demonstrates leadership in the development of a nursing (and wider-team) culture of support, respect and inclusiveness of all staff
Leading the implementation of nursing workforce development	- Role-models an understanding of Health New Zealand workforce development initiatives and assists nurses to apply these to their practice - In conjunction with nurse educators (if part of the area team), develops and implements workforce development initiatives to support nurses' and student nurses' development - Fosters a culture of workforce development in the team. This includes being engaged in their own supervision, and encouraging nurses to have their own supervision
Providing liaison between the nursing team and other med/surg clinical areas, and local, regional and national health services	- Ensures liaison with local, regional and national services to assist with coordinated care approaches for individual tāngata whaiora - Proactively fosters relationships with local, regional and national health services to develop approaches to general tāngata whaiora care
Taking a leadership role innovation and improvement	- Fosters a culture where individuals are encouraged to share their suggestions on how to improve and enhance practice - In consultation with the Nursing Director Lead, leads practice innovation projects
Demonstrating collaboration and relationship management	- Role-models positive collaborative relationships - Coaches nursing staff to have positive individual and team relationships - Works with peers and other cultural supports to ensure the voice and direct aspirations of Māori and Pacific people are reflected in planning and delivery of services
Taking a leadership role in health & safety	- Exercises leadership and due diligence in health and safety matters and ensures the successful implementation of health and safety strategy and initiatives - Takes practical steps to mitigate risks and hazards in the workplace that could cause harm, whilst maintaining high-quality tāngata whaiora outcomes - Leads and promotes continual improvement in health and wellbeing to create a healthy and safe culture
Taking a leadership role with compliance and risk	- Takes responsibility to ensure appropriate risk reporting, management and mitigation activities are in place - Ensures compliance with all relevant statutory, safety and regulatory requirements applicable to the speciality area - Understands, and operates within the financial and operational delegations of their role, ensuring peers and team members are also similarly aware

- Assists with target and goal identification and supports data gathering and reporting (such as treatment KPI's, databases, incident management and other) processes as required.

Matters which must be referred to the Nursing Director Lead

- Matters which pose a risk to tāngata whaiora safety or which may affect a nurse's ability to safely practice.

Relationships

External	Internal
• Professional and industrial organisations • NGO's, Māori and community providers • Primary Care	• Staff of the Christchurch and wider campuses • Tāngata whaiora and their whanau or families • Service Leadership Teams
